## **35mm DISASSEMBLY TECHNIQUE**

## **STUDY PROCEDURE**

1. Read and study, "35mm Disassembly Techniques."
2. You should know:
  - A. why you should remove the bottom cover first
  - B. how to use and how to soften locking agents
  - C. the general techniques and precautions in removing the top cover
  - D. how to adjust the transport latch
  - E. precautions in removing and replacing leatherette
  - F. how to check the flange-focal distance
  - G. techniques and precautions in removing and replacing front standards.
3. Since this lesson covers introductory materials in disassembly, there is no practical assignment. You will be applying these concepts as you study camera mechanisms. Before actually working on a complete camera, you may wish to review the materials in this assignment.
4. Place your completed LESSON QUIZ and form #6611-C1 in the return envelope.

To avoid delays, DO NOT include correspondence to other departments in your lesson shipment.
